MedLight 50+40

MedLight 40

MedLight 40 light head delivers a illumination of 175,000 Lux with 86 LEDs.

Indigenously designed arm structure increase the maneuverability of the light.

MedLight 50

MedLight 50 light head delivers a illumination of 200,000 Lux with 105 LEDs.

Minor Procedure Illumination Light

Once activated, lights at the center pod remain illuminated.

Integrated Video System (Optional)

The MedLight LED lights are available with a fully integrated, high quality Samsung make camera system. The optional camera can be suspended on separate arm.

Endo Light

MedLight series offer an Endo Light setting.

Touch Controller

Smart Sensor Technology

A system of sensor in the light decreases the illumination of the LEDs directly above the surgeon head and increase the illumination on the surgical field.

Aerodynamics and Laminar Compatibility

Dome design with low aerodynamic resistance protects the surgical room's laminar air flow during the operation.

Dome is made of high quality fire resistant ABS material.

Offering different configuration to meet the needs of surgeon.

European's Pattern Arms

Intelligent Release Height Control – the light arms can be locked to a specific height in case of RELEASE.

Variable Color Temperatures

The appropriate light is available for every surgical field, depending on the tissue color, individual perception or surgical application. The Medlight lights have the ability to change to three different color temperature (3700K, 4300K, 4800K).
