

OneTouch **NMT**<sup>TM</sup>

**STIMPOD**  
**NMS 450X**

Simple. Economical. Proven.

**20 Years** of Quantitative **NMT** Monitoring Innovation

# The **STIMPOD** Quantitative **NMT** Monitor

**Train of Four** | Twitch | **Post Tetanic Count** | Double Burst | **Nerve Mapping & Locating** | Tetanus

## Simple

- OneTouch NMT™ Monitoring
- Quick Setup & No Calibration
- Electrode Placement Verification
- Handheld or IV Pole Mount
- Data Connectivity
- Versatile Sensor Placement:  
thumb, toe or face

## Economical

- Reusable 3D AMG Sensor
- Standard ECG Electrode Compatible
- Quantitative NMT Monitoring reduces incidence of residual paralysis, increases operating room throughput and lowers cost of patient care

## Proven

- Over 20 years of AMG research in the public domain
- Residual paralysis is identified in 97% of patients
- Trusted by anaesthesiologists in over 40 countries
- STIMPOD technology pioneering quantitative monitoring since 1998
