

**CE**  
2460

**G6/G6+ can real time monitor the changes of physical signs of fetal and maternal. It was designed in compliance with different requirement of antenatal, child birth and postpartum patients with international standards**

## Features

10.4" color TFT LCD which can display waveform and data simultaneously  
 Function of FHR ,TOCO, FM and activities of Fetal  
 Calculation of Auto/Manual fetal movement  
 Auto/Manual Patient ID generation , easy user management & Data searching  
 Display/Offser of printing of twins FHR waveform,  
 Three Monitoring Modes : Fetal, Fetal and /Maternal,  
 Maternal  
 Real time printing and timing printing

## Configuration

G6 : FHR +TOCO+Fetal Movement,+Battery+ 110mm printer  
 G6+ " FHR+TOCO+Fetal Movement+Maternal ECG+NIB-P+SPO2+RESP+TEMP+PR+Battery+110mm Printer  
 Optional Configurations : Twins FHR, Fetal wake-up alarm, wireless central monitoring

## Specifications

### FHR

Ultrasound Frequency : 1MHz+/-1KHz  
 Ultrasound input intensity : <10MVV/CM2  
 Range :30~240 BPM  
 Accuracy : +/-1BPM  
 Alarm limit & tolerance : Max (32-240)bpm : Tolerance +/-5%  
 Min (28-238)bpm : Tolerance : +/-5%

### TOCO

Measurement Range : 0-100%  
 Resolution :1%  
 Pressure tolerance : +/-6.7%  
 Zero-mode : Manual and Automatic  
 Fetal Movement :  
 Count mode : automatic and manual  
 Automatic fetal movement waveform

### Printer

Wide line printer  
 Printing paper : Foldable Z type thermal paper  
 Width : 110 mm  
 Sweep speed :1,2,3 cm/min 25mm/sec
