

# 4K Laparoscopic Camera

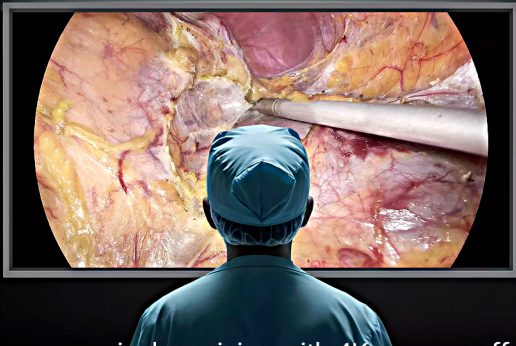

Let your Surgical Precision fly to new heights

## SR-9

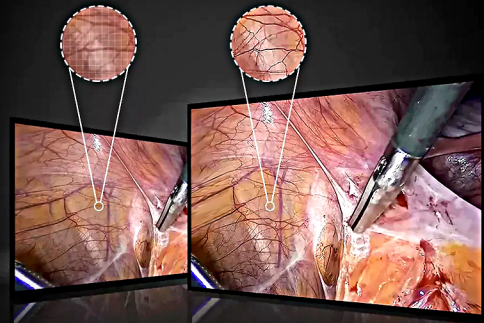

4K Laparoscopic camera, equipped with ultra HD resolution, revolutionizing surgical visualization. Experience the future of Endoscopy Imaging with advanced technology, designed to elevate surgical performance and patient care to new heights.

### Large Immersive Imaging

Enhance surgical precision with 4K camera, offering detailed zoom capabilities for clear visualization of even the smallest anatomical nuances

### Fourfold Pixels Power for Detailed Zoom

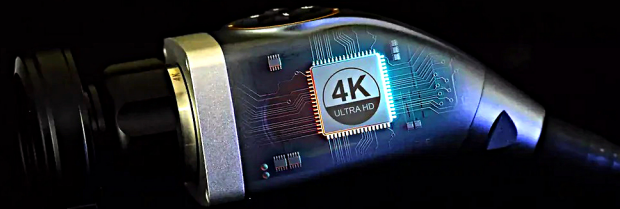

Even the smallest details are captured and surgeons can zoom for precise examination during Laparoscopy and other surgical procedures.

### Ultra HD Resolution

Clarity and accuracy with high processing speed at 60 frames per second with zero delay. Suitable for ENT, Hysteroscopy, Urology, Arthroscopy etc.

### CMOS Chip Sensor with 3x Power

The incorporation of 4K Ultra HD CMOS chip technology with three times more power in laparoscopic cameras marks a significant advancement in medical imaging.

### Inbuilt Surgical Recorder

Record 4k Videos and Images of Surgeries by connecting external USB hard disk upto 1TB and users can playback recorded content directly on the camera itself, eliminating the need for a separate PC.

### Multiple Monitor Output

With multiple HDMI outputs, it allows connection to two monitors simultaneously
