# Video Laryngoscope SC-01

## MEDICAM'S Feature Rich Video Laryngoscope SC01

Intubation procedure require skills and secondary confirmation device to ensure correct positioning of the tube. MEDICAM Video laryngoscope is a dependable device that helps anesthesiologist to carry out the complex procedure with ease.

The product looks like a normal laryngoscope retaining all the advantages. But what makes it class apart is the small camera fitted on it. One tiny addition that makes a big difference.
