# cardiolife AED

Fighting Disease with Electronics

# Take action,

# Always be ready

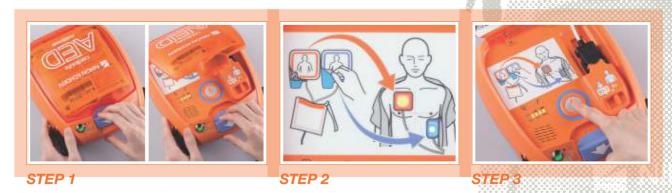

During daily self-test, AED checks automatically its condition including battery, pads and failure of circuit. You can see your AED condition with simple status indicator.

In emergency situation, AED-3100 always be ready to save a life.

# Within the reach of anybody

AED should be easy and intuitive to use for anybody. Even if you are not a medical professional, AED-3100 is ergonomic design for you to use it without doubt and interruption.

### STEP 1 Open the lid

Open the lid to turn on the power. The voice instruction starts immediately to guide you how to operate AED.

### STEP 2 Attach the pads to the patient

After attaching the pads, AED immediately starts to analyze ECG. Defibrillation pads have the colors (blue/orange) to make you easy to attach the pads as illustrated.

### STEP 3 Push the button

If the shock is needed, the shock button is flashing. Push the button to deliver the electrical shock to the patient.

# **Save** a life

## Safe and efficient treatment

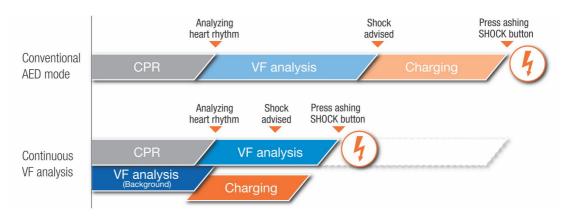

International resuscitation guideline recommends to reduce the energy for child patient to avoid burning of heart muscle. AED-3100 can reduce the

### Save a life with innovation

#### **Continuous VF analysis**

**Continuous VF analysis** is available on AED-3100. With this function, the ECG waveform can be analyzed even during CPR and energy charging starts before the shock is advised. This helps you deliver faster defibrillation than ever before.

#### Fast analysis and charging

It takes less than 15 seconds from turning the power on to discharge. Faster charging time helps you deliver energy quickly when VF is observed.

#### **Specifications**

Energy	Adult: 150-200-200J Child: 50-70-70J
User interface	Instruction by voice, CPR timing sound 100 times / minute (option)
	Indicator (green/red), shock button, adult/child key
Battery	Capacity: 200 discharges or 7.5 hours monitoring
	Stanby life: 4 years
Analysis time	less than 8 seconds, minimum 4.5 seconds
Form turn on to discharge	less than 15 seconds (with new battery)
Size	206(W) x 252(D) x 97(H) mm
Weight	2.3 kg with battery and pads, 1.9 kg without battery and pads
Standard	Vibration: MIL-STD-810F 514.5C category 4 and category 9, EN1789
	Water and dust proof: IP55
Voice Prompt	English / Hindi / Japanese

### **Options**

- Battery Pack
- AED Box
- Defibrillation Pads
- Hindi Voice Prompt
- AED Bag
